Life-like Dentures — for patients of *every* race!

A patient's color and complexion need never be a bar to natural appearance in denture materials. Translucent and delicately mottled, *Lucitone* is as fair as the Fifteenth Amendment (racial freedom): it allows the natural coloration of any gum tissue to show through.

The result is a life-like appearance that could never be obtained with a denture material of a "flat pink" color.

For modern, undetectable dentures, specify *Lucitone* —the denture material made by Du Pont exclusively for dentistry, and distributed by Caulk.

McNutt Addresses American Medical Association

Discusses the Procurement and Assignment Service and the Urgent
Need for Physicians

Paul V. McNutt, Federal Security Administrator, in a thought-provoking address to the House of Delegates of the American Medical Association, infers that methods other than those provided under Procurement and Assignment Service may become necessary for the adequate enlistment and proper distribution of physicians. His address is published in the June 20th issue of the Journal of the American Medical Association.

MAN POWER SURVEY

He states that in every walk of life man power needs are being studied and that every American will be called on to do whatever is necessary to achieve victory. Our obligations are so heavy that we do not yet realize the fundamental sacrifice we must make.

He congratulated the Medical Association on the vigorous action it had taken to survey and tabulate the medical personnel of the country. He said, "No other part of the total man power job is so well blue-printed today as is the mobilization of medical service. In determining what is necessary, we are now engaged in the total 'diagnosis' of America's manpower needs . . . No labels will stand in the way. No a priori theories of political or economic organization can stand in the way of effective action. Those principles which support effective

action will stand. Any others will have to suffer a moratorium."

In discussing the results to date of the Procurement and Assignment Service in regard to physicians, McNutt stated bluntly that not enough volunteers were being secured, not as many as the Procurement and Assignment Service expected. Where 12,000 physicians volunteered in the first six months of the last war, slightly more than 3,000, not obligated by reserved commissions, have volunteered in the similar period of this war.

CIVILIAN SERVICE

He also pointed out that the Army and Navy are not the only problem; that the acute need for civilian service is not yet appreciated. More physicians are needed in industrial areas and in defense boom towns. Some communities have grown from a rambling rural village of a thousand people to a town with a population of 30,000 to 50,000, and are without adequate medical care. Physicians will have to be assigned to those towns on a voluntary basis or by some other method.

REHABILITATION

The growing problem of rehabilitation is also under consideration. The mechanized equipment and high pressure pro-

duction has increased accident rates, thus there will be a vast increase in industrial casualties added to the training and battle front casualties. The casualties must be rehabilitated as rapidly and as efficiently as possible for every man-hour on the production line is needed and, therefore, every manhour of medical service is also needed.

SOCIAL PROGRESS

McNutt recalled the advances that American Medicine made during the last war and pointed out how the profession has developed beautifully in the last quarter of a century in medical education and scientific research. The profession is now faced with an acute social problem presented by total war and he hopes that the management of the problem will be studied thoroughly and objectively. Thousands of young physicians are needed immediately and they must make whatever arrangements are necessary for their older associates to handle their practices. The Government feels that older men should remember that they had their chance in the last war and that they must not only stay at home but must extend the scope of their activities to meet the medical needs of the civilian communities.

EMERGENCY MEASURE

He stated that the Procurement and Assignment Service for the war emergency was set up in collaboration with the medical profession to facilitate the channeling of physicians to military and civilian service, and that it would not be continued after the war. "There was nothing of theory in the establishment of the Procurement and Assignment Service," McNutt said. "It was a proposal to solve in a practical manner a problem of great urgency. It was not imposed by the government. It was set up, I repeat, at the suggestion of your profession. It investigated all aspects of the problem of providing doctors in an

equitable way for military and civilian service. It made the arrangements with Selective Service for the deferment of medical students. It has safeguarded your professional interest in every way.

"At the same time, it has accepted the obligation to deliver the doctors that the nation needs to the points at which they are needed. Now let us look at the record.

"The plain fact and conclusion is simply this: The Army and Navy and the war industry areas have not gotten the doctors they need. The careful safeguards that were set up by the Procurement and Assignment Service have apparently slowed down the rate of recruitment. The voluntary plan must work and work promptly—or some other more vigorous plan will have to be produced.

"Yours has been an outstanding effort in canvassing and classifying every member of your profession. You have still in your hands the machinery by which a self-governing profession can demonstrate its ability to meet the tremendous demands of total war. And I appeal to you to make that machinery work.

"Yours is an important profession. It is the first to require rationing—rationing which will make sure that there are enough doctors to meet the needs of every unit of the home front and of the battle front. The issue is who shall do the rationing, for America must have the doctors it needs."

WILL ADDRESS BOSTON MEETING

Mr. McNutt is to address the American Dental Association at its annual meeting in Boston. His message to dentistry will be important and is awaited with keen interest. At the present time statements from the Procurement and Assignment Service indicate that dental enlistments have been satisfactory. It is hoped that dentists will continue to volunteer their services to meet the existing emergencies.

Red Cross to Conduct First Aid Classes for Society Members

To Be Given in All But Three Branches—Postgraduate and Defense
Committees Joint Sponsors—Begin Week of July 6

Every member of the Chicago Dental Society now has the opportunity to enroll in a Red Cross First Aid Class composed exclusively of dentists, and qualify for either (1) a certificate in First Aid or (2) as an instructor in First Aid. For the former 20 hours of instruction are required and for the latter an additional 15 hours or a total of 35 hours are required. Classes will be given in five branch districts with the cooperation of the branch societies. Instruction is not offered in the North Suburban, West Suburban or Englewood branch territories for the reason that classes are already in progress or have been completed recently.

There is no charge for this instruction. Every enrollee will be required, however, to supply himself with an official Red Cross First Aid Manual and a bandage for class use. These items may be purchased from the class instructor at the first session for \$1.00.

Enrollment is simplicity itself. Just fill out the coupon below and mail to the Chicago Dental Society, 30 North Michigan Avenue. If you don't want to cut out the coupon use the one you received by direct mail. If that isn't available just drop a post card or note in the mail stating the class in which you wish to enroll.

Following is the schedule of classes offered in five branches including time and place of classes and date of first session. There will be a session of each class weekly thereafter—same time—same place.

KENWOOD-HYDE PARK

Place: Hyde Park Bank Bldg.

Sessions: Tuesdays from 7 to 9 p.m.

First session July 7.

NORTH SIDE

Place: Wilson Ave., Y.M.C.A., 1725 Wilson Ave.

Sessions: Mondays 7 p.m.

First session July 6.

NORTHWEST SIDE

Place: Irving Park Y.M.C.A., 4259 Irving Park Rd.

Sessions: Thursdays 9 a.m.

First session July 9.

SOUTH SUBURBAN

Place: Elks Club, Harvey

Sessions: Thursdays 7 p.m.

First session July 9.

WEST SIDE

Place: Gold Dome Bldg., Garfield Park

Sessions: Tuesdays 11 a.m.

First session July 7.

Arrangements for this opportunity were made with Mr. Edward J. Slezak of the Chicago Chapter, American Red Cross by Drs. George W. Hax and Charles W. Freeman, Chairmen respectively of the Postgraduate Instruction and Civilian Defense Committees.

"The Keys to Health and Happiness"

Dental Hygiene Institute Completes First Educational Film

J. D. MERSHIMER

Dental health education through the use of slide films became a reality on June 15 when the Dental Hygiene Institute of Chicago completed its first picture, "The Keys to Health and Happiness."

When the Institute was first organized, it was pointed out there are many organizations throughout the Chicago area which would be glad to present an interesting and instructive program on dentistry to their membership. These groups include women's clubs, parent-teacher associations, service groups, men's organizations, and others. To provide the material for such programs, the Institute plans to produce a number of sound slide-films dealing with dental care. A sound slide-film consists of a series of still pictures held momentarily on a screen to the accompaniment of a record-player built into the projector.

"The Keys to Health and Happiness" is a dramatized story relating difficulties of an average American family when the mother is feeling miserable because of an infected tooth and because of a missing tooth which detracts from her smile. A ten-year old daughter in the opening scene is a shy, unhappy youngster who has a bad case of malocclusion. Father brings his boss home to dinner, and the party is disastrous.

After the party, mother and daughter seek dental care. A similar dinner party is held a year later following dental treatment, and the party, of course, is an immense success. In fact, father gets a new job.

The idea of the film is to convey the "positive" side of dentistry. In other words, dentistry can be definitely related to health and happiness in such a way that our message is easily understood by the lay public. The film is designed for lay audiences; it is not a technical film to be shown exclusively to dentists.

The script was approved by a committee of five dentists—H. R. H. Brevig, Lon W. Morrey, G. M. Hambleton, Joseph B. Zielinski and Charles J. Coffey—from the Chicago Dental Society prior to production. The entire cast, including the models who appear in the picture and the voices that will be heard from the record, are professional people; that is, professional models and radio actors. This is definitely not an amateur production. The producing company is the Chicago Film Laboratory, Inc., a substantial Chicago firm with a successful record of both slide film and motion picture production—the same company that produced that excellent picture for the American College of Surgeons, entitled "White Battalions."

The film was completed June 15. Since a number of organizations, such as the Parent-Teacher Associations, the American Legion Auxiliary, the Federation of Women's Clubs, and others, are now represented on the Board of Directors, it is certain that showings of the film will be numerous. Showings will be arranged without charge before any lay group in the Chicago area and the film accompanied by a trained dental speaker.

This most interesting story was unfolded by Mr. William B. Pringle, Educational Director of the Dental Hygiene Institute of Chicago, during an interlude in the filming of "The Keys to Health and Happiness." A few minutes later we were picking our way through a tangle of lights, cameras and properties to get a view of the work of the director, cameramen and electricians in producing the many scenes to be arranged and photographed. It seemed to us as we watched the actors really live this story of dental education for the laity that the picture might even be worthwhile producing just for those few engaged in making it and their circle of friends if it

never was shown to any audience. But when we considered the thousands of people destined to witness the picture and listen to the story in the record as well as the words of the trained dental speaker presenting the film, we had visions of a greatly increased demand for dental services in all of our offices.

Here was another answer to the question—"What is the Dental Society doing for me?"—and not only the Society but the lay members of the Institute whom we are fortunate to have working in our behalf as well as for the public good. How about sending in that \$5.00 for an active membership? This writer is one who thinks that the individual member

would not object to greatly increased dues if he could see a direct benefit from such increase. Certainly we are no different from other professional groups who pay dues as high as \$75.00 per year. Let us have some expressions of opinion in this matter. Here is a chance to get back a thousand for every dollar expended, while at the same time fulfilling our duty to humanity by serving many more people. The \$12,000 budget of the Institute for the first year should certainly be doubled for next year. All of us should contribute our share since all of us shall benefit. Let's get behind this best program ever offered dentistry for "ethical publicity."

LETTERS

The following interesting letter was received from Dr. Toby Weinshenker, a Northwest Side member, now serving in the Army Dental Corps.

May 22, 1942
Somewhere in
New Caledonia

Dr. Ben Davidson
Correspondent, Northwest Branch
Hello Ben:

This letter will come probably as a surprise to you, but I received the Chicago Dental Society Fortnightly Review today listing the men in service. It mentions that they would like to hear from these men, so here's a brief report from the New Caledonia branch of the Chicago Dental Society.

After spending almost a year at Camp Forrest and vicinity, our regiment was picked for foreign service. We left the states for point X late in January, and after a monotonous sea voyage of thirty-eight days covering over 10,000 miles, we finally landed in Australia. We stayed there about a week, boarded another boat and again headed for point X (which we now believed was a myth). Finally, after six days of sailing, we arrived at New Caledonia, a Free French island about 1,000 miles off the east coast of Australia.

This island is beautiful in some spots and a hell hole in others. We've been in both types. Luckily, our present area, where we hope to stay for awhile, is all one could ask for. Palm trees, oranges, lemons, bananas, coconuts and crystal clear streams help to make it a fairly passable substitute for Chicago.

I share a native hut with another officer and we are certainly far from suffering. This hut is really something to see, being made of bamboo and bark, and costing us the magnificent sum of 400 francs, approximately ten dollars in American money. There's no F.H.A. out here so we had to pay cash.

We are in the middle of "winter" down

here, and it is almost impossible to believe that the tropics could get so cold. It is necessary to have several blankets at night, though during the day it warms up considerably.

Our dental work is somewhat limited by the equipment we have; I have made no Chayes bridges or Vitallium partials for quite a while (just like Chicago). We have plenty of dental work to do as there are quite a few men in our regiment, so we never want for patients. Our work is limited to amalgams, silicates and, of course, extractions. It has made me realize that dentistry can be done without a lot of unnecessary doodads and frills which we seemed to find so necessary in our offices back home. It is a great experience and I feel I am a better dentist because of it.

Personally, I have been feeling fine. This outdoor life is sure doing me a lot of good. It will be very difficult to go back to civilization and worry about such things as wearing ties, and having such conveniences as electricity, hot water, etc. It's amazing how you can acclimate yourself to being without things that you always thought were absolute necessities.

The only dark cloud in all this sunshine is the fact that I have become a proud father since leaving the states. It's very difficult to be thousands of miles away from home and a daughter that you have never seen. Due to the slow mail, it was six weeks after the baby was born before I heard of it, and let me tell you that's a long time to pace up and down. Other than that and being away from my wife and family, I wouldn't at all mind this experience. Of course, as yet, the Japs haven't been around but we are watching and waiting and will give them a good show when they arrive.

Well, I hope that this letter finds you in the best of health. Give my regards to all the men at the branch and our Square Table.

Toby.

LETTERS

Another letter from a dentist in the service has been received and is published below.

Territory of Hawaii
June 4, 1942

Dear Harry:

My first anniversary as a commissioned officer in the Army was celebrated recently. It was just a year ago that I left Scott Field at St. Louis for Camp Forrest, Tennessee. Many things have happened to me in that time. In fact, it has been the most eventful period in all my life. As I think back on the happenings of the past year, I wonder how so much could be accomplished in a mere 365 days. Now that my second year of Army life is under way I wonder what 1942 has in store for us.

Upon arriving in Hawaii I was originally assigned to a Station Hospital at Schofield Barracks. On December 6 I went to a party in Honolulu and, contrary to my usual custom, I returned to the Barracks about midnight instead of staying in town. Little did I know that a few hours later all hell would break loose. Bullets are still being picked from the molding of the Hospital for souvenirs. Later I was assigned to a Medical Battalion, then to the Field Artillery and now to the Coast Artillery, which is an anti-aircraft outfit and has charge of the searchlight defense of the Island. It is a large organization having positions over the entire Island. Consequently we built a makeshift dental trailer with the aid of the engineers. It was a hard job to construct and equip such a project. Now that we have it working, this dental trailer is my pride and joy. I have a regular Weber dental chair, a motor driven unit (picked up the motor in a salvage yard and reconditioned it), an electric sterilizer, electric fan, electric lights and an operating light. The current used is derived from a mobile searchlight battery. It is really a complete unit and I handle all routine operative and extraction treatments with ease. The Department was pleased with the idea and may

make a few more now that the trailer has proved itself to be successful. My trailer moves from position to position as the need warrants, and believe me, I am a real traveling dentist.

I am feeling fine and enjoy the great outdoors. I live in a room that is not blacked out and is impossible to black out as it is nothing but screens. I arise at 5:30 a.m. daily, including Sundays, have my morning setting-up exercises and eat breakfast at 6:45 a.m. The remainder of the day we are on our own. We eat our noon meal at 12:30 and evening mess is at 5:30 p.m. I am gaining weight as I have a hearty appetite due to my outdoor living. I weigh more now than at any other time in my life. This Army food really does things to people.

Our evenings are tough. It is impossible to maneuver around after dark in the field. When we have bright moonlight we sit up and discuss conditions while watching the moon and the millions of twinkling stars. Everybody has the same thought in mind when looking at the sky. Lonesomeness is the thing that really bothers us. We think of the good old United States and the folks back home. My days of playing golf and tennis are gone. However, I still manage to go swimming in the blue Pacific. We rigged up an outdoor shower by having water run through a tin can punched with holes. This arrangement is quite useful as the weather now is very hot.

Living conditions here are a bit different from what they were in Honolulu. There we went swimming regularly at Waikiki beach. As you no doubt know, the Royal Hawaiian Hotel has been taken over completely by the U.S.O. There are special rooms for officers where we can rent bathing suits, towels, etc. There is also a bar-room, but only beer is served.

I went to a game cock fight the other day for diversion. One of the native Filipinos raises and trains game cocks; these are vicious creatures that attempt to tear each other apart, and the Filipi-

(Continued on page 21)

EDITORIAL

PRIORITY FOR HEALTH CONVENTIONS

The government has requested that certain expositions, fairs, conventions and non-essential meetings be discontinued until after the war. Because of the existing emergency this request is understandable. However, this restriction should not apply to conventions that are concerned with health. Now, of all times, the public health should be kept at the highest possible level, and measures to maintain or elevate it should receive every reasonable consideration.

One of the most effective and stimulating means of developing and disseminating knowledge and practices for physical fitness is through the medium of conventions. The clarity in understanding and the stimulation which is obtained by the personal contact between the clinician or the essayist and his audience cannot be secured in any other way. The published word, as a rule, is not as effective in conveying information as is the personal demonstration and discussion.

The personal contact is not only an inspiration to the health workers, who form the listeners at health conventions, but is equally a stimulus to those who appear on the programs. The incentive to prepare material for publication and to develop new information would be reduced if the opportunity for presenting the results of painstaking study to a receptive audience were removed.

As an example, we believe in the field of dentistry, the rapid developments in the use and refinement of plastics is due in no small measure to the personal contacts which the students of this subject have had at dental meetings. The loss of the opportunity for discussion and argument by the curtailment of dental meetings would lessen the interest in such subjects and would slow their progress.

Conventions held in an area such as Chicago where large numbers of professional men in the armed services are stationed should provide a helpful postgraduate course of instruction for them. Programs will be planned with this opportunity in mind. Such gatherings also can be effective morale builders and permit diversions which will increase the efficiency of those who attend. Wherever possible business should be continued in its customary channels; the depressing implications of curtailment should be avoided.

The main reason given for the curtailment of meetings is the conservation of transportation facilities. No bulky equipment which would hamper freight shipments is required for health conventions. The majority of those attending are from the vicinity in which the meeting is held. Those who travel distances come from widely scattered directions and on a staggered schedule so they should not interfere with troop or governmental passenger traffic.

The test of the value of a meeting is the interest and attendance it secures. Those which have shown a steady increase must be providing a need which the rank and file of the profession requires. These should be continued for the stimulus they apply to the development of knowledge and for the media they offer for the dissemination of useful information to those in the health professions for application in the community or the armed force in which they serve.—*Robert G. Kesel.*

Dental Hygiene Institute Elects Officers and Directors

First Slide-Film on Dental Health Exhibited at Annual Meeting

Having completed its first sound slide-film, the Dental Hygiene Institute of Chicago held its first annual meeting on June 15 at the Palmer House, for the purpose of showing the film to the general membership and to hold an election of officers for the year 1942-43.

The film was approved by the Institute Board, subject to minor corrections, and at a later showing on June 15, the film was unanimously endorsed by the directors of the Chicago Dental Society. As of June 23, nine programs had been booked, before parent-teacher or women's clubs, for the fall season. These programs will include, in addition to a speaker, the slide-film, "The Keys to Health and Happiness," or the motion picture "About Faces" previously purchased by the Institute. Promotion plans are progressing to secure a really substantial number of bookings before similar groups, in addition to which men's organizations also are being approved.

BOARD INCREASED

With the thought in mind that lay people interested in health education could do much to further the film-and-speaker activity of the Institute, the Nominating Committee planned for an increased number of directors. The by-laws were amended so as to increase the number of directors from six to fifteen, and to provide a "rotating" Board by electing five for three-year terms, five for two-year terms, and five for one-year terms. At subsequent annual meetings, five directors will be elected for three-year terms, a method which insures that at all times, there will be ten people on the Board with at least one year's experience.

The Nominating Committee's report was accepted, and there were no other nominations. Consequently, the election

of the officers and directors was made unanimous.

NEW OFFICERS

Mrs. Loren E. Shears, who had just concluded a term as Secretary of the Institute, was elected President. Mrs. Shears was associated with the Mouth Hygiene Council, predecessor to the Dental Hygiene Institute, and has long been active in parent-teacher and women's club circles in Chicago. Following her election, Mrs. Shears expressed her keen interest in furthering the cause of dental health education, and pledged her best efforts to see that dentistry's story, through the medium of films and speakers, reached a great number of audiences during the coming year.

Other officers include Dr. Mary Newell, 1st Vice-President; Mrs. Theodore B. Sachs, 2nd Vice-President; John J. Hollister, Secretary; and Dr. H. R. H. Brevig, Treasurer. Dr. Newell has long been interested in dental health education, and has served actively in both the Mouth Hygiene Council and the Institute. Mrs. Theodore B. Sachs is Executive Secretary of the Tuberculosis Institute of Chicago and Cook County, and has taken an active part in developing the Institute. John J. Hollister, Executive Secretary of the Chicago Dental Society, will be in position to reflect the Society's viewpoint as a Member of the Institute's Executive Committee. Dr. Brevig has just concluded a term as Chairman of the Society's Public Relations Commission, and has taken an extremely active part in all the Institute's activities.

DIRECTORS NAMED

Directors include the following:

One year terms:

Mrs. Warner Sivyver, immediate Past-

President of the Institute, and representing the Community Council of Hyde Park, Kenwood and Oakland.

Mrs. E. W. Palm, 1st Vice-President of the Cook County District of the American Legion Auxiliary.

Mrs. Richard Hallinan, Member, Advisory Board, Women's Field Army of the American Society for the Control of Cancer.

Mrs. Sidney Levy, Welfare Chairman of the Chicago Woman's Aid.

Miss Evelyn Maas, Advisor to Oral Hygienists at Northwestern University.

Two year terms:

Mrs. Leonard Graf, Summer Round-Up Chairman of the Illinois Congress of Parents and Teachers.

Dr. Adelaide Doolittle Hoeffel, Public Health and Child Hygiene Chairman of the Illinois Federation of Women's Clubs.

A. H. Pritzlaff, Director of Physical Education for the Chicago Board of Education.

Leo Lyons, Executive Director, St.

Luke's Hospital.

Harold W. Welch, Past President of the Chicago Dental Society.

Three year terms:

J. Walker Black, Vice-President, General Printing Company.

Earl K. Spangler, General Manager, The L. D. Caulk Company, Chicago.

Jules M. Ehrhardt, President, Ehrhardt and Company.

Harry B. Price, President, Price Dental Depot.

Carl F. Deysenroth, Executive Secretary, The Milk Foundation, Inc.

The officers and directors are considered representative of groups with whom the Institute wants to work. Naturally, approval of all Institute activities must first be given by the Professional Policy and Guidance Committee, composed exclusively of dentists nominated by the Chicago Dental Society.

The new officers and directors took office as the final order of business at the meeting at which they were elected.

ADDITIONS TO THE MEDICAL PROFESSION

Perhaps the most accurate index of actual additions to the medical profession of the United States is to be found in the medical licensure statistics collected by the Council on Medical Education and Hospitals of the American Medical Association and published annually in the State Board Number of The Journal. The number of graduates of the medical colleges of the United States includes a certain number of students from foreign countries and does not include students from the United States graduating from Canadian medical schools. Neither does it indicate the graduates of the foreign medical schools who initiate practice in the United States. Data presented elsewhere in this issue indicate that there were 5,681 additions to the medical profession in 1941. The number lost to the profession each year by death is approximately 3,700. There has thus occurred

during 1941 a net increase of approximately 1,900 in the number of physicians in the United States. Of these 5,681 newly licensed physicians, 626 were graduates of foreign medical schools and 226 were graduates of unapproved medical colleges in the United States. During 1941, 4,738 graduates of approved medical colleges were added to the profession in the United States. Accumulated data indicate that during the past seven years there have been 41,983 new additions to the profession.—*Journal A.M.A.* 119: 182 (May 9, 1942).

* * *

Now that we are at war with Japan, it is interesting to note who is paying our enemy's share of the war. All foreigners leaving Nippon in recent months have had to leave behind all their removable gold bridgework. If it was not removable it was taxed accordingly.

Roster of Branch Memberships of CHICAGO DENTAL SOCIETY For 1942-1943

In this issue the membership rosters of the North and West Suburban branches are presented. Please check your name for correct spelling, address and branch listing and forward any corrections to the Secretary, 30 North Michigan Avenue, Telephone State 7925. Retain this roster for future reference along with the lists of other branches published in the next issue.

"NOW IS THE TIME . . ."

For you Golfers and you Non-golfers too, to have
one last spree before you start your vacation.

The Place to do it is the Westward Ho Country Club.
(Take North Avenue to Melrose Park.)

The Time to do it is on Wednesday, July 15.

The Reason for doing it is to win one of the valuable prizes and to enjoy the good fellowship, both of which there will be an abundance. (You don't have to play golf to win a prize.)

The Fee for it all is only \$4.00 including dinner or \$2.50 for the dinner.

The Occasion is the Chicago Dental Society Annual Outing.

GOLF - BASEBALL

DINNER - PRIZES

NEWS AND ANNOUNCEMENTS

PUBLIC ASSISTANCE PROGRAM INFORMATION

Any licensed dentist in the state is eligible to be placed on the roll from which dentists are selected to care for old age assistance clients under the program developed by the Illinois State Department of Public Assistance. It is stressed, however, that participation in the program is entirely voluntary for each dentist, but he cannot receive patients under the program unless he has volunteered.

It is expected that the most frequent question that will arise will deal with the payment of the dentist. Under the present program, the dentist is paid directly by the old age client who receives a grant for dental care from the state. In some cases, the patient has used this grant for other than dental care and the dentist has lost his fee. In some of these cases, dentists have asked that payment for dental work be made directly by the state department to the dentist. While this may or may not be a desirable method, the fact remains that the federal law under which these grants are made forbids handling funds in this manner. Until the federal law is changed, then, present methods of payment must remain as it is entirely outside of the jurisdiction of either the state department or of the state society.

In order to protect the dentist, it is suggested that he does not complete his work until sufficient payments have been made so that he is protected against loss. If payments are not made by the client he can discuss the matter informally with the director or the county committee and almost always satisfactory arrangements will be made or the grant stopped.

County committees have been established in every county of the state. The Cook County Committee is composed of the following members: Felix Tittle,

Chairman; S. M. Rakow and A. H. Mueller. Any problems that arise under these dental programs should be submitted directly to this Committee.

THE NAVY NEEDS PHYSICIANS AND DENTISTS

Recent rumors that the Navy is no longer accepting applications for commissions in the Medical and Dental Corps were declared today (Mon.) by Naval procurement officers as being without foundation.

Comdr. Emil J. Stein, senior medical officer at the Office of Naval Officer Procurement in the Board of Trade Building, said that the enlistment of thousands of men daily made it imperative for the Navy to keep the fighting fleets and shore establishments supplied with physicians and dentists to maintain the high Navy health standards.

"The procurement of physicians and dentists is vital to the Navy now. Trained men are needed to treat the sick and wounded. We are here to help these trained men get into naval service with a minimum of delay," he pointed out.

Physicians and dentists from 21 to 50 years of age who can pass the physical and other requirements may apply for commissions. Practicing physicians and dentists receive ranks ranging from lieutenant, junior grade, to lieutenant commander according to specialties, experience and other qualifications.

Applicants living in the thirteen states in the Ninth Naval District—Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska, North and South Dakota, Indiana, Kentucky, Ohio and Michigan—should apply in person or by letter to the Office of Naval Officer Procurement, Board of Trade Building, Chicago. Those living at distant points will be notified where to report for physical examinations if they qualify otherwise.

NEWS AND ANNOUNCEMENTS

MAJOR COFIELD APPOINTED LIAISON OFFICER TO AMERICAN DENTAL ASSOCIATION

Major Kenneth R. Cofield has been appointed by the Surgeon General's office to act as liaison officer between the Surgeon's office of the Sixth Corps area and the American Dental Association.

SERVED FOURTEEN MONTHS

Prior to his new appointment, Major Cofield served fourteen months as Executive officer in the Sixty-Fifth Medical Regiment stationed in Georgia. He will be pleased to consult with those dentists who are contemplating army duty and will give all possible assistance and information. He is located at the American Dental Association offices, 222 East Superior Street, Chicago.

ADMIRALCY IN DENTAL CORPS

Representative Carl Vinson, of Georgia, Chairman of the House Naval Committee, yesterday instructed representatives of the American Dental Association to draft a bill to create the rank of admiral in the Medical Corps of the Navy, to be held by an officer of the Dental Corps. Representatives of the Association wished to attach such a rider to the Selection Suspension bill, but Mr. Vinson said that inasmuch as it would be general legislation, it should be separate. He said that he would sponsor the bill and that he would ask for recommendation from the Navy Department. A representative of the Dental Association told the Committee that the Navy Medical Corps approves of the proposed law.

LETTERS

(Continued from page 11)

nos are known to produce the fiercest game cocks in the world. All the spectators bet on the one they think will win. It was a bloody battle and was interesting to watch, but I don't think I would care to see another one.

Things are very quiet and peaceful at present. I honestly believe that the Japs will not be having everything their own way anymore, and I seriously doubt whether they will ever make an attempt to attack us here again. We are ready and waiting and are in a real fighting mood. God help those yellow devils if they attempt to dislodge us from our mountain positions.

Your letter was most welcome and I appreciate all the news that it contained. Hope that you will write more and often.

Yours sincerely,

Louis A. Goode

1st Lieutenant Army Dental Corps

FOR ECONOMY'S SAKE

Instead of throwing away the celluloid strips used when inserting synthetic porcelain fillings, sterilize them by boiling and use them over and over again.

REJUVENATED MODELING COMPOUND

Old modeling compound can be rejuvenated and made workable again by softening it in hot water and then kneading a little vaseline into it.

Dr. Maurice S. Altus makes the following suggestion: Why not remove the two rubber plungers from the glass carpules after use instead of throwing them away. A large amount of rubber can be accumulated in this way if every dentist follows this advice.

NEWS OF THE BRANCHES

WEST SIDE

The West Side Golf outing held at the Itasca Country Club on June 17 proved a great success. All credit goes to our chairman Al Sells and his able assistant J. S. Vission. Approximately sixty-five men attended. Perfect weather, in addition to Golf, Soft-ball, Horse-shoes, Cards and good fellowship helped make the day most enjoyable. Golf and door prizes were won by the following: W. R. Gubbins, J. S. Owen, Sidney Goren, Max Chubin, J. S. Vission, Samuel Kretshmer, James Guerrero, Frank Kropik, George Blaha, A. J. Sells, D. W. McEwen, and W. A. Whittaker . . . Earl P. Boulger presented a silver plaque to Emory J. Lusk in appreciation of his efforts in the various offices he has held during his many years of service to the West Side Branch . . . Sidney Goren is leaving in the near future to serve in the Army . . . George R. Walls attended a Kiwanis Club meeting in Cleveland, Ohio, while visiting there a short time ago . . . Frank G. Conklin inaugurated the 1942 vacation season on June 1, by retiring to his summer home in Canada. We may expect to see him again on the West Side after the first of September . . . Harvey M. Lancaster, returning from a two week fishing trip, in the vicinity of Minocqua, Wisconsin, reports the Muskie fishing as exceedingly good . . . The Red Cross Instruction Course will be held at the Garfield Park Administration building. The Committee expects to announce the date of the first session very soon.—*George F. Vogt, Branch Correspondent.*

NORTH SIDE

A number of the North Siders were present at the annual Northwestern University Dental School Homecoming and Alumni Day. Leo Kremer gave the low down on the Procurement and Assign-

ment Service which should have cleared up the situation for all present. Roland Weber and Arthur Blim listened to Glenn Cartwright give an impromptu clinic. Clarence Peterson received for Colonel Cowan the Alumni Award of Merit of Northwestern University Dental School. Incidentally, Clarence Peterson is the chairman of the Attendance Committee and he, as well as his able assistant G. N. Youngson, threatens dire consequences to members not attending the coming meetings . . . Rudy Meesis and his wife just returned from a week's sojourn in the Smoky Mountains . . . Roland Weber reports his fishing trip a success with an abundance of walleyes . . . Bob Becker could get a few tips from our ranks . . . Dr. B. H. Rose, a new member, entertained a group of his classmates at his home. Welcome to the Chicago Dental Society B. H. . . . After thirty months of active duty with the navy at Great Lakes and Navy Pier, Lt. Commander A. A. Gilbert was transferred to the Naval Aviation Cadet Selection Board in St. Louis. Keep them flying, Art! . . . Ed Shapiro thinks it would be a grand idea to have a professional blood bank, in other words a Dental Day, at which time all blood donors who are dentists could do their part toward saving the life of some soldier or sailor in far off lands. Call Dr. Shapiro for further information about this . . . Due to many requests another Red Cross First Aid Course for branch members is now being organized under the sponsorship of the Postgraduate Instruction and Civilian Defense Committees of the Chicago Dental Society. For enrollment details see the special article in this issue of The Fortnightly Review.—*Orrin G. Baumgarth, Branch Correspondent.*

NORTHWEST

The annual golf day of the branch was held at the Illinois Country Club, Wed-

nesday, June 24. As to the attendance, weather and prize winners, all that will have to wait for the next issue of the REVIEW since this is being written before the event has taken place. All that the chairman knows at the moment is that there were forty-one advance reservations, almost a record for this branch. . . . Harry Holm is celebrating his entrance onto the roll of Illinois State Life members by taking his wife and two daughters for a trip to California. He will be gone until the first of August and will then be ready to start on the second twenty-five years . . . Augie Pecaro, another one of our life members, has just been elected Commander of his American Legion Post . . . Captain Axel Pederson spent the last week end in town visiting some of his former classmates. Axel is stationed at Camp Grant, training medical selectees . . . Le Roy Maas has reported as a First Lieutenant at Camp Bowie in Texas. He will serve at the base hospital there . . . Alf Altern reported for service as a Lieutenant (Junior Grade) at Navy Pier . . . And so the list will grow until the job is done . . . Add to the Wonders Will Never Cease Column. Last fall or thereabouts, John Meinhardt ordered himself a new Plymouth. Then came Pearl Harbor and John sort of gave up the idea of the new car and waited for his deposit to come back. Lo, last week John came into possession of his car as per order, but your informant still does not know whether it arrived with four or five tires . . . Walter O. Boeck reports the annual July 4, trip to Greenville, Michigan with his wife, son and of course mama-in-law, the one we wrote about last year in this column . . . Oliver Ulvested has been reported quite ill. We all hope that he will be back at the chair again soon . . . The square table finished its third year with a party in Joe Zielinski's play room. That a good time was had by all has been reported, but it seems as though dentistry was still the major topic for some at the party. The Rover Boys had a session extraordinary from which came the news that the next trip will be to Madison, Wisconsin, with

a side trip to the Mayo clinic as an added inducement. Irv Neer gave a clinical demonstration on how to handle an ability to draw . . . The Board of Directors of the Branch is busy making the rounds of the various possibilities for a meeting place for the coming year. At the moment the choice centers around a location at North and Damen Avenues, a good transportation center, with an air-conditioned room which will exclude the noises that seemed to be a necessary part of the series of meetings held last year.—*Ben Davidson, Branch Correspondent.*

NORTH SUBURBAN

The dental fraternity did right well at the "Rodayo" sponsored by the Evanston Chamber of Commerce on June 17. Bob Lasater came through with a snappy seventy-seven to win low gross and with it the possession of the beautiful Director's Trophy . . . O. E. Scott and L. V. Stephenson played in the foursome with Bob Lasater and Steve was the only one not to win a prize. He shot a good game but was just unlucky. That haggling foursome, Earle Bommersheim, Rondy Davy, Bill Murray and Zeke Smothers all received low net prizes but by the time they got around to selecting them all that were left were some tricky bottle-openers . . . Jeff Schroeder was called down for a final type physical examination the other day (he holds a commission as Major in the Inactive Reserve) and had to fill out a questionnaire relative to his status, former condition of servitude and what have you. Among the questions to be answered was one about hobbies. Jeff could think of no outstanding accomplishments in this field, other than the fact that he used to shoot a good game of billards, so he put that down. The questionnaire was promptly returned for more complete details. Will someone please give Jeff the right cue? Among the early fishermen were Norm Laird—who spent ten days among the lakes of Wisconsin, Al Bushey, A. J. Wurth and Frank Trangmar, who came back with tales of Rainbow trout

practically jumping into their boat—their happy hunting ground being Watersmeet, Michigan. Cliff Hill has quite a man sized job with the office of Civilian Defense . . . Captain John Hannon has been called to active duty and has closed his office for the duration . . . After three years of trial and tribulation your correspondent lays down the mantle of office with this issue. This has been no one man job and we wish at this time to pay tribute to our corps of helpers—Leonard McEvoy, Frank Trangmar and J. D. “Sam” Pett. These men have been responsible for the newsgathering (your correspondent has been responsible for most of the ribbing.) We can’t end this fulmination of futility without one last crack. The orthodontists, in pure self defense, have selected one of their own kind to carry on from here. To Fred Barich, the new Branch Correspondent, we offer felicitations and the best of luck.—*James H. Keith, Branch Correspondent.*

WEST SUBURBAN

The Round Table group Red Cross First Aid Course has now been completed and the forty-three men who took the course will receive their official certificates. This valuable instructive course under the able direction of Dr. C. J. Weigel, assisted by Frank Young, made the last ten meetings of the Round Table extremely interesting. To the instructors we owe a great vote of thanks. The course although of a serious nature was not entirely without humor, for example: Frank Young asked the question, “How should a patient be treated who has been subjected to carbon monoxide poisoning in a garage with a motor running”? The answers were slow in coming until John Dumelow responded, “Turn off the motor to save gas.” The course was accompanied by examinations which caused some of the men to hold clandestine reviews. A few who indulged in these cram courses were—Earl Crawshaw, Arthur Skupa, George Welk, and Rudolph Weihe. Grades of the final

examination should make interesting reading . . . Major William Tolar, who was Chief Dental Clinician at Camp Grant, Illinois, has been transferred to Fort Sheridan . . . Matilda is having the house painted while Bill’s away . . . Bob Christopher is still at Camp Custer . . . Nick Sothras is at Camp Berkeley in Texas . . . We received a nice letter from Major Robert Mulholland, who is a Division Dental Surgeon at Camp Forrest. Ed Vonesh is still in camp with him . . . Ken Ladwig is now at home convalescing . . . E. J. Sullivan is at West Suburban Hospital recovering from an appendectomy . . . Al Ryan has been confined to his home with an attack of pleurisy. Here’s hoping you fellows get well in a hurry . . . Ernie Hudec encountered an inebriate at Lake Delavan who was in need of first aid. Ernie made use of his training by attempting to put a splint on the drunk’s bloody nose. We ask you—Who was feeling how? . . . Art Skupa has gone to Canada to get the big ones . . . R. G. Greenwood and family are vacationing at Indian Lake, Michigan . . . When you get around to it, ask Lyle Filek about his new use for a cow horn forcep . . . The Branch extends sincere sympathy to the family of Miss Maud Gubbins who recently passed away. Miss Gubbins gave many years of faithful service to the University of Illinois College of Dentistry.—*Joseph M. Lestina, Branch Correspondent.*

ENGLEWOOD

The Englewood Dental Golf Tournament held at Lincolnshire Country Club, Crete, Illinois, on June 17 is now history. The weather was perfect for the outing and about seventy-five turned out to battle old man par. The Society ruling prohibiting the solicitation of prizes from dealers and laboratories reduced the number offered but some of the members came to the front and contributed a number of very fine prizes. Our thanks to Emil Aison, Charles Coffey, John Hoppers, Charles Hillier, Earl Harris, J. Lynch, Howard Miller, Jack Thompson

and Jerry Wilher for their evidence of loyalty and sportsmanship. Golf balls were awarded to the two low men in each foursome. Prize winners included Earl Harris, R. H. Marks, Thomas Cavanaugh, L. P. McParland, John Hospers, T. C. Starshak, W. V. Hillemeier, Samuel Binder, B. H. Jostes, Leon Phillips, Walter Laederach and Ivan Haag, in addition to about ten others who drew door prizes by lot. The Committee wishes to thank everyone who came out and helped make the day a success . . . We were glad to see Tom Starshak on the golf course after his siege of illness . . . The Red Cross class of eighty-two members which meets each Wednesday morning will soon turn out some fine instructors . . . The Committee on committees met Tuesday, June 23, to start the ball rolling for the new Branch officers and the activities of the coming year . . . M. J. Hoffman just returned from a two week fishing trip spent in Ontario, Canada . . . Ivan Haag and several other Englewood members are taking flying instructions . . . James Stokoe and A. J. Tanis are back in town after a week's fishing in Wisconsin . . . About 350 attended the annual Northwestern homecoming. The program consisted of Manufacturer's Exhibits, Table and Lecture Clinics. Leo Kremer was elected President of the Alumni Association, and the retiring president, Milton Cruse, was elected to the Board of Directors.—*Albert J. Tanis, Assistant Branch Correspondent.*

KENWOOD-HYDE PARK

The Kenwood golf outing was a fair success. If the attendance had been doubled it would have been an outstanding event. The steak dinner was delicious, and Grover Schubert led all the patrons to the nineteenth hole where he demonstrated his choice cement mixing technique, and silent John McBride proved that his stomach had been permanently lined without processing . . . Anxious Jim Lynch decided to take a week off after several hours of floor pacing. The birth of his son was too

much of an ordeal, and Jim departed for northern Michigan in order to rest his jittery nerves . . . Harry Hartley is fishing in northern Wisconsin . . . Edward Budill toured the southland and on the way back stopped in to see our former Branch Member, Ed Reed, at Seidel, Illinois . . . Rudy Grieff, who was forced to postpone his vacation because of the illness of his mother, is leaving the city this week . . . J. F. Thomson is leaving for a week's fishing trip north of the Sault. As soon as the versatile doctor returns he will spend a considerable amount of time inspecting his potato crop in Indiana . . . John McBride has begun his usual week-end trips to Michigan. The informer wishes to know if silent John possesses nerve enough to ask her now . . . Cliff Randall just returned from a trip to New York . . . Drop us a line and let us know what you intend to do this summer.—*Howard E. Strange, Branch Correspondent.*

SOUTH SUBURBAN

The next piece of work for South Suburban officers will be the selection of all the committees for the new term . . . Peter Paul Iagmin, our newly elected President, is now facing this problem and will have all committees functioning within the next few weeks . . . Past President Taylor Bell and Mrs. Bell left last week for a two weeks' vacation in Spooner, Wisconsin. They plan to spend most of their time golfing and fishing . . . Your correspondent with his wife and daughter will leave soon for a three weeks' vacation traveling through the Colorado. While on this trip he will take movies of all the interesting places visited . . . A suggestion from your correspondent is the formation of a Male Chorus of which we have the nucleus in Tommy Scanlan, Peter Iagmin, D. C. Altier, and L. G. Bettenhausen. This was proven to us at our recent golf tournament . . . No doubt my desk will be crowded for space upon my return from my vacation, which will mean "whipping up" a column in a hurry.—*L. C. Holt, Branch Correspondent.*

Contributors

Manuscripts should be typewritten, double spaced, and the original copy should be submitted. Every effort will be made to return unused manuscript, if request is made, but no responsibility can be accepted for failure to do so. Anonymous communications will receive no consideration whatever.

Manuscripts and news items of interest to the membership of the Society are solicited.

Forms close on the fifth and twentieth of each month.

REMOVE DENTURES DURING AIR RAIDS, DOCTOR WARNS

At a recent meeting of the New York Dental Society, Dr. Douglas B. Parker warned dentists attending that artificial dentures should be removed during air raids. He said: "A hit on the head or stumble in the dark may cause a person to swallow his teeth and create greater injury than any suffered in a raid."

BUTLERIZE YOUR PRACTICE

Teach each patient the proper use of the Butler brush—check at regular intervals the progress and watch closely to prevent substitution on the part of some individual who does not know the importance of a proper brush of the type and design of the Butler. Results will be gratifying.

John O. Butler Company

7359 Cottage Grove Avenue

PATIENTS

PATIENTS

PATIENTS

New patients will buy dentistry and old patients will buy more and better dentistry when they can pay through the medium of monthly payments.

Begin today telling your patients that *all* the dentistry you suggest can be completed starting immediately and that it can be paid for by convenient monthly payments. You will find that they will agree more readily to have all the dentistry done that you suggest; that they will in many cases select higher priced dentistry; and you will have fewer broken appointments.

It is so simple to complete the details in the privacy of your office.

NO DOWN PAYMENT OR DEPOSIT REQUIRED.

FIRST PAYMENT IN THIRTY DAYS.

IN 7 NEW-DENTURE CASES OUT OF 10

DR. WERNET'S POWDER

may make all the difference!

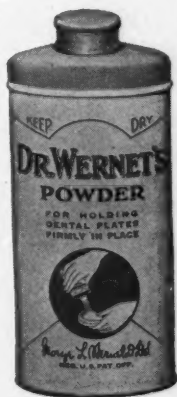

Shorten the difficult "learning" period for the majority of your patients with Dr. Wernet's powder.

To claim that without the use of Dr. Wernet's Powder a denture will be unsuccessful is of course absurd; but dentists tell us that 70% of new-denture cases develop a higher degree of security and definitely faster control through the use of this premier powder.

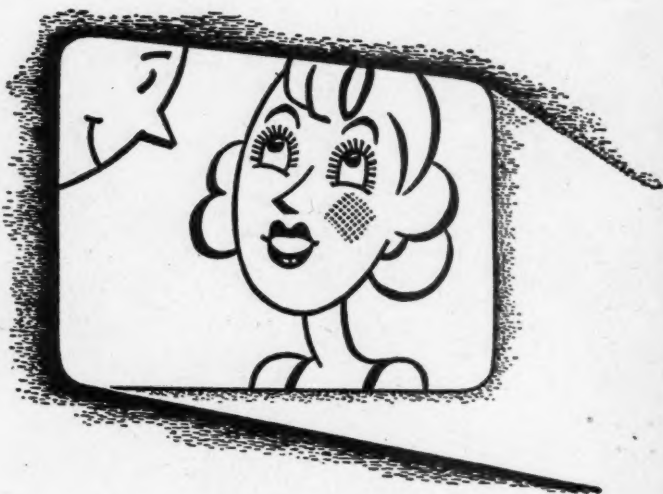

Admittedly those first two or three weeks while the new denture is seating itself are a make-or-break period for you and your patient both, since the latter invariably measures your work by how quickly he or she can eat and talk—and smile—with confidence. And the finest denture ever made may not survive this period unless there is proper cooperation, and a denture "help" like Dr. Wernet's Powder.

Fifty percent more viscous, 46.5% more absorbent, 26.1% whiter and purer, Dr. Wernet's Powder is as safe as it is soothing and digestible.

Write for your free supply of Dr. Wernet's Powder. Wernet Dental Mfg. Co., Dept. R-9, 190 Baldwin Ave., Jersey City, N. J.

ADAPTS THE PATIENT TO THE DENTURE

**The Hollywood Star may
know about glamour, BUT...**

the dentist is better qualified to judge and recommend dental products. That's why the makers of Pycopé Tooth Powder and Pycopé Tooth Brushes never advertise to the public. Your patients appreciate—and value more highly—your recommendation of products that are not ballyhooed through mass advertising. Remember—the only way your patients

hear about Pycopé is through you.

PYCOPÉ

PY-KO-PAY

TOOTH POWDER AND TOOTH BRUSHES

ASSURE

micromatic accuracy
IN OCCLUSION AND FIT

Successfully used in over 5000 cases—*Micro-matic ADAPTOCCLUSION* eliminates off bites and raised posteriors. You don't have to excuse yourself to patients by explaining that you must grind the teeth to occlusion. *Micromatic ADAPTOCCLUSION* assures micromatic accuracy in occlusion and fit.
